

Zhenhao Liu

Hangzhou, China • liuzhenhao@westlake.edu.cn • likc1606.github.io • github.com/LikC1606

Education

Westlake University Hangzhou, China
Undergraduate Program in Artificial Intelligence 2024-Present
GPA: 3.753/4.3
Selected Coursework: Machine Learning (A+), Natural Language Processing (A), Large Language Models (A)

Research Interests

Automated scientific discovery; scientific agents; AI-assisted research workflows

Research Experience

Westlake NLP Lab, Westlake University Hangzhou, China
Undergraduate Research; Advisor: Prof. Yue Zhang 2024-Present

- Investigate automated scientific discovery and scientific agents through data collection and curation, agent-based system integration, and end-to-end evaluation.
- Contribute to collaborative studies of AI-scientist capabilities, human-AI responsibility in peer review, and evidence-grounded scientific originality evaluation.

Publications

RepDuet at NLPCC 2026 Chinese BabyLM: Task-Specific Hybrid Representations for the Cognitive Track

Zhenhao Liu, Qiuji Xie, Minjun Zhu, Zhiyuan Ning, Yixuan Weng, Pinzhang Li, Jiajun Wang, and Yue Zhang
NLPCC 2026 Shared Tasks (accepted poster); **sole first author** [Paper] [Model & Code]

- Designed and executed the end-to-end study: developed task-specific hybrid representations for word- and sentence-level fMRI encoding, trained the models, and integrated **DeepScientist** into the research workflow.
- Ranked first after organizer reproduction. Established the robustness of the representation design through controlled comparisons and participant-level stability analyses; released the model and inference code.

How Far Are AI Scientists from Changing the World? A Survey of Autonomous Scientific Discovery

Qiuji Xie et al. (including Zhenhao Liu)
EMNLP 2026 Main Conference (accepted) [OpenReview] [arXiv]

Contribution: Collected and curated evidence across the scientific discovery lifecycle, supporting the survey's synthesis of AI-scientist capabilities and unresolved barriers.

AI Drafts, Humans Judge: Quantifying the Human-AI Responsibility Boundary in Peer Review

Zhouyang Wang et al. (including Zhenhao Liu)
EMNLP 2026 Main Conference (accepted) [OpenReview]

Contribution: Collected and curated peer-review data supporting the analysis of responsibility boundaries between AI-generated drafts and human judgments.

Selected Research Project

Evidence-Grounded System for Scientific Originality Evaluation 2026

Primary contribution: data curation, system integration, and end-to-end evaluation

- Curated a study dataset from expert judgments, benchmark papers, and bibliometric records for a six-level, evidence-traceable originality framework.
- Integrated the full pipeline from paper screening to dual-agent review, multidimensional rating, and evidence-linked output. Evaluated it against benchmark and expert-review sets.

Honors & Awards

2026	IOAI ² AI Track	Grand Master Trophy
2026	ICPC Asia East Continent Final [Result]	Silver Medal
2025	ICPC Asia Xi'an Regional [Result]	Gold Medal
2025	CCPC Zhengzhou Site [Result]	Gold Medal
2025	ICPC Asia Shenyang Regional [Result]	Silver Medal

Technical Skills

Programming Languages: C++, Python

Research Prototyping: AI-assisted rapid prototyping and end-to-end integration of research systems
