

Zhenhao Liu

Hangzhou, China • liuzhenhao@westlake.edu.cn • likc1606.github.io • github.com/LikC1606

Education

Westlake University

Undergraduate Program in Artificial Intelligence

GPA: 3.753/4.3

Selected Coursework: Machine Learning (A+), Natural Language Processing (A), Large Language Models (A)

Research Interests

Automated scientific discovery; scientific agents; representation learning; cognitive NLP

Research Experience

Westlake NLP Lab, Westlake University

Undergraduate Research; Advisor: Prof. Yue Zhang

- Investigate automated scientific discovery and scientific agents through data curation, agent-based system integration, and end-to-end evaluation.
- Develop representation-learning approaches for cognitive NLP, using controlled comparisons, stability analysis, and reproducible experiments.

Publications

RepDuet at NLPCC 2026 Chinese BabyLM: Task-Specific Hybrid Representations for the Cognitive Track

Zhenhao Liu, Qiuji Xie, Minjun Zhu, Zhiyuan Ning, Yixuan Weng, Pinzhang Li, Jiajun Wang, and Yue Zhang

NLPCC 2026 Shared Tasks (accepted poster); **sole first author** [Paper] [Model & Code]

- Developed RepDuet's task-specific hybrid representations for word- and sentence-level fMRI encoding; designed the study, trained the models, and integrated **DeepScientist** into the research workflow.
- Achieved first place after organizer reproduction. Validated the representation design through controlled comparisons and participant-level stability analyses, and released the model and inference code.

How Far Are AI Scientists from Changing the World? A Survey of Autonomous Scientific Discovery

Qiuji Xie et al. (including Zhenhao Liu)

EMNLP 2026 Main Conference (accepted) [OpenReview] [arXiv]

Contribution: Collected and curated evidence on AI-scientist capabilities and open barriers across the scientific discovery lifecycle.

AI Drafts, Humans Judge: Quantifying the Human-AI Responsibility Boundary in Peer Review

Zhouyang Wang et al. (including Zhenhao Liu)

EMNLP 2026 Main Conference (accepted) [OpenReview]

Contribution: Collected and curated peer-review data used to quantify human-AI responsibility in peer review.

Selected Research Project

Evidence-Grounded System for Scientific Originality Evaluation

Primary contribution: data curation, system integration, and end-to-end evaluation

- Curated a study dataset from expert judgments, benchmark papers, and bibliometric records for a six-level, evidence-traceable originality framework.
- Integrated the full pipeline from paper screening to dual-agent review, multidimensional rating, and evidence-linked output. Evaluated it against benchmark and expert-review sets.

Honors & Awards

2026 IOAI² AI Track

2026 ICPC Asia East Continent Final [Result]

2025 ICPC Asia Xi'an Regional [Result]

2025 CCPC Zhengzhou Site [Result]

2025 ICPC Asia Shenyang Regional [Result]

Grand Master Trophy

Silver Medal

Gold Medal

Gold Medal

Silver Medal

Technical Skills

Programming Languages: C++, Python

Research Prototyping: AI-assisted rapid prototyping and end-to-end integration of research systems
