

Zhenhao Liu

Hangzhou, China • liuzhenhao@westlake.edu.cn • likc1606.github.io • github.com/LikC1606

Education

Westlake University Hangzhou, China
Undergraduate Program in Artificial Intelligence 2024-Present

GPA: 3.753/4.3

Selected Coursework: Machine Learning (A+), Natural Language Processing (A), Large Language Models (A)

Research Interests

Automated scientific discovery; scientific agents; representation learning; cognitive NLP

Research Experience

Westlake NLP Lab, Westlake University Hangzhou, China
Undergraduate Research; Advisor: Prof. Yue Zhang 2024-Present

- Conduct end-to-end research in automated scientific discovery and cognitive NLP, spanning data curation, model design, agent-based system integration, controlled experimentation, and reproducible implementation.

Publications

RepDuet at NLPCC 2026 Chinese BabyLM: Task-Specific Hybrid Representations for the Cognitive Track

Zhenhao Liu, Qiuji Xie, Minjun Zhu, Zhiyuan Ning, Yixuan Weng, Pinzhang Li, Jiajun Wang, and Yue Zhang
NLPCC 2026 Shared Tasks (accepted poster); **sole first author** [Paper] [Model & Code]

- Formulated the study and designed task-specific hybrid representations for word- and sentence-level fMRI encoding; trained the models and integrated DeepScientist into the end-to-end research workflow.
- Achieved first place after organizer reproduction. Validated the representation design through controlled comparisons and participant-level stability analyses, and released the model and inference code.

How Far Are AI Scientists from Changing the World? A Survey of Autonomous Scientific Discovery

Qiuji Xie et al. (including **Zhenhao Liu**)

EMNLP 2026 Main Conference (accepted) [OpenReview] [arXiv]

Contribution: Collected and curated evidence for a lifecycle analysis of AI-scientist capabilities and unresolved barriers.

AI Drafts, Humans Judge: Quantifying the Human-AI Responsibility Boundary in Peer Review

Zhouyang Wang et al. (including **Zhenhao Liu**)

EMNLP 2026 Main Conference (accepted) [OpenReview]

Contribution: Collected and curated peer-review data for studying responsibility boundaries between AI drafts and human judgments.

Selected Research Project

Evidence-Grounded System for Scientific Originality Evaluation 2026

Data curation, system integration, and end-to-end evaluation

- Curated a study dataset combining expert judgments, benchmark papers, and bibliometric records to support a six-level, evidence-traceable originality framework.
- Integrated the complete pipeline from paper screening and dual-agent review through multidimensional rating and evidence-linked output; evaluated it against benchmark and expert-review sets.

Honors & Awards

2026	IOAI ² AI Track	Grand Master Trophy
2026	ICPC Asia East Continent Final [Result]	Silver Medal
2025	ICPC Asia Xi'an Regional [Result]	Gold Medal
2025	CCPC Zhengzhou Site [Result]	Gold Medal
2025	ICPC Asia Shenyang Regional [Result]	Silver Medal

Technical Skills

Programming Languages: C++, Python

AI-Assisted Development: Rapid prototyping and integration of research systems with coding agents
